

The "Discrete Optimization Group" at EPFL, Switzerland <http://disopt.epfl.ch/> invites applications for a Postdoc position.

The appointment is initially for 12 months with a possible extension of another 12 months.

The research interests of the group are in integer programming, approximation algorithms, network design, computational and discrete geometry and applied optimization. We are looking for a candidate whose research interests lie in at least one of the fields above.

The Postdoc position comes with teaching obligations. This either means that the prospective holder of the position serves as a teaching assistant or teaches one course per semester at the doctoral level.

Applications (including curriculum vitae, list of publications, research plan, names of three references with their e-mail addresses, and intended period of stay) should be sent to Friedrich Eisenbrand (friedrich.eisenbrand@epfl.ch). Electronic applications are welcome and should consist of one single PDF-file.

The deadline for applications is December 31, 2009.
