———    **MASTER OF SCIENCE IN BIG DATA PROGRAM**

**March 11, 2016**

Dear Sir/Madam,

We would like to announce that ENSAI has begun its recruitment process for the 2016 – 2017 academic year for its Master of Science in Big Data program, taught entirely in English. As a respected academic institution, we wanted to share this information with you and your students.

ENSAI is seeking highly motivated students with a strong background in Mathematics and Computer Science to apply for this unique and innovative degree. Numerous Big Data programs have surfaced in the recent past, most of which are highly IT-oriented. ENSAI has chosen to go a different route. While students learn not only the latest in technological know-how, they also master the statistical and mathematical skills we believe are essential to becoming successful, skilled data scientists.

As one of France's *Grandes Écoles*, ENSAI has made a name for itself in Europe and beyond. The quality of the education at ENSAI is the direct result of having professors who are also highly respected researchers in their fields. Combine that with the small size of the school, and it is easy to understand why ENSAI is known for its expertise in the fields of Statistics, Computer Science, and Economics. Outside the classroom, ENSAI has built strong links with the business world and is producing graduates who are in very high demand.

We hope you will share this information with your students and faculty. Thank you in advance for your time.

Kind Regards,

Esther Lalau Keraly  
Director of International Relations
