

## **Post-doc research position in Graph Theory**

- (1) Name of University: South China Agricultural University
- (2) Research field: Graph Spectrum, Graph Partition problem)
- (3) Knowledge in a certain field (Graph Theory and a rudimentary understanding of Graph Spectrum) is required.
- (4) Post-doctoral period length (two years)
- (5) The approximate amount of the scholarship or salary, etc.
  - (i) The salary is approximately 250000 RMB before tax and approximately 190000–200000 RMB after tax if the applicant has published at least two papers that are cited by JCR (Q2 or Q1). The corresponding work tasks require the post-doc to publish at least four papers (indexed by SCI or SCIE), of which at least one is cited by JCR (Q2 or Q1).
  - (ii) The pay is approximately 200000 RMB before tax and approximately 170000 RMB after tax if the applicant has published at least two papers that are cited by SCI or SCIE; the related job assignments need the post-doc to publish at least four publications (index by SCI or SCIE).
- (6) Monthly payments account for 80% of the annual wage, with the remaining 20% being based on performance; all incentive performance is granted upon passing the assessment in the first year, and it is awarded to those who meet the exit conditions in the second year. The school offers postdoctoral apartments with basic living amenities or a rental subsidy of 1500 RMB per person per month
- (7) Contact: Prof. Muhuo Liu, Department of Applied Mathematics, South China Agricultural University, Guangzhou, P. R. China, 510642
